Introduction

Design engineers come regularly to the TraceParts CAD platform looking for supplier-certified 3D product models that can be instantly downloaded in the CAD format they want.

In 2016, TraceParts delivered over 69 Million CAD models from its CAD library, helping more than 16.5 Million designers, having access to TraceParts CAD data via its publishing network, find the right component they need for their application.

This Design Activity Report will give you detailed information about the profile of design engineers who downloaded CAD models per product family, country, type of industry, job title, department and size of their company.

This Design Activity Report about pneumatic components was based on 3,588,350 CAD models downloaded via the TraceParts Publishing Network in 2016.
